

StileLine™ - A Tradition of Quality

StileLine, the steel storefront division of Stiles Custom Metal, Inc., has built a solid reputation for creativity, quality workmanship, outstanding service, and on-time delivery. With over 3 decades of design, engineering, and manufacturing experience, we offer unparalleled flexibility and aesthetics in stainless steel, bronze, and pre-finished steel storefront systems.

Architects specify StileLine systems on projects ranging from high-rise hotels to small signature-piece commercial buildings. StileLine is equally at home on both new and restoration projects, and functions in either interior or exterior locations, offering longer spans and far more creative options than conventional systems.

Building First Impressions that Last

When it comes to architecture, we realize the importance of first impressions and take utmost care in tailoring our systems to exceed even the most demanding expectations. Because each system is built to order, you have the ability to specify nearly any profile, depth, or shape. No detail is ever overlooked or compromised.

Using superior quality sustainable materials and processes, StileLine systems are built to the highest standards of performance, longevity, and ease of installation. We invite you to experience the StileLine difference.
